## Open Data Circle of Awesomeness

A diagram to illustrate the variety of different long term benefits that open data can bring to a city, and the different groups that can provide expertise and input for the common goals of everyone.

## example 1: transit data

increased

ridership and

rider satisfaction

real time

transit data

apps to find the

bus or train

in real time

## example 2: hydrant data

decreased workload app to adopt a hydrant and shovel multiple city adoptions it out in snow

## an event for software developers, designers, entrepreneurs, etc. to work with city staff, local organizations, community members and leaders to use technology to build solutions.
